CONTENTS

Volume 8, Issue Nos 1–6

HYDROLOGICAL PROCESSES

VOLUME 8, ISSUE No. 1 *January–February 1994*

Sampling Strategy to Describe the Temporal Hydrochemical Characteristics of an Alpine Proglacial Stream: A. M. Gurnell, G. H. Brown and M. Tranter 1

Streamflow Routing in the Indian Arid Zone: K. D. Sharma, J. S. R. Murthy and R. P. Dhir 27

Accuracy of Kinematic Wave and Diffusion Wave Approximations for Space Independent Flows: V. P. Singh 45

Aquatic Weed Growth and Flow Resistance: Influence on the Relationship Between Discharge and Stage Over a 25 Year River Gauging Station Record: A. M. Gurnell and P. Midgley 63

Differences in Oxygen-18 Content of Throughfall and Rainfall in Hardwood and Coniferous Forests: D. R. Dewalle and B. R. Swistock 75

Water Balance Modelling in Lateritic Terrain: E. Langsholt 83

VOLUME 8, ISSUE No. 2 *March–April 1994*

In-Channel Surficial Fine-grained Sediment Laminae. Part I: Physical Characteristics and Formational Processes: I. G. Droppo and M. Stone 101

In-Channel Surficial Fine-grained Sediment Laminae. Part II: Chemical Characteristics and Implications for Contaminant Transport in Fluvial Systems: M. Stone and I. G. Droppo 113

Invariance and Scaling Properties in the Distributions of Contributing Area and Energy in Drainage Basins: P. La Barbera and G. Roth 125

Flow Transmission Along an Arid Zone Anastomosing River, Cooper Creek, Australia: A. D. Knighton and G. C. Nanson 137

Testing and Comparison of Four Ionic Tracers to Measure Stream Flow Loss by Multiple Tracer Injection: G. W. Zellweger 155

Sources and Sinks of Sea Salt in a Newfoundland Blanket Bog: J. S. Price 167

VOLUME 8, ISSUE No. 3 *May–June 1994*

Converting Tropical Rain Forest to Forest Plantation in Sabah, Malaysia. Part I. Dynamics and Net Losses of Nutrients in Control Catchment Streams: H. Grip, A. Malmer and F. K. Wong 179

Converting Tropical Rainforest to Forest Plantation in Sabah, Malaysia. Part II. Effects on Nutrient Dynamics and Net Losses in Streamwater: A. Malmer and H. Grip . . 195

Estimation of Groundwater Recharge in a Basaltic Aquifer: A. B. Narayanpethkar, V. V. S. G. Rao and K. Mallick 211

Capturing the Essential Spatial Variability in Distributed Hydrological Modelling: Hydraulic Roughness: B. E. Vieux and N. S. Farajalla 221

Measuring Channel and Gully Cross-sections with an Airborne Laser Altimeter: J. C. Ritchie, E. H. Grissinger, J. B. Murphey and J. D. Garbrecht 237

Hydrological Management of a Cutover Peatland: A. L. Heathwaite 245

Hydrology and Related Changes After Harvesting Native Forest Catchments and Establishing *Pinus Radiata* Plantations. Part 1. Introduction to Study: L. K. Rowe, A. J. Pearce and C. L. O'Loughlin 263

VOLUME 8, ISSUE No. 4 *July–August 1994*

Hydrology and Related Changes After Harvesting Native Forest Catchments and Establishing *Pinus Radiata* Plantations. Part 2. The Native Forest Water Balance and Changes in Streamflow After Harvesting: L. K. Rowe and A. J. Pearce 281

Hydrology and Related Changes After Harvesting Native Forest Catchments and Establishing *Pinus Radiata* Plantations. Part 3. Stream Temperatures: L. K. Rowe and C. H. Taylor 299

Accuracy of Kinematic Wave and Diffusion Wave Approximations for Space-Independent Flows with Lateral Inflow Neglected in the Momentum Equation: V. P. Singh. . . 311

Multiple Flow Direction Algorithms for Runoff Modelling in Grid Based Elevation Models: An Empirical Evaluation: P. Holmgren 327

A Case Study in Catchment Hydrochemistry: Conflicting Interpretations from Hydrological and Chemical Observations: A. Jenkins, R. C. Ferrier, R. Harriman and Y. O. Ogunkoya 335

Partitioning of Rainfall in a Cocoa (*Theobroma Cacao* Lour.) Plantation: R. A. C. de Miranda 351

Isotopic Study of Alluvial Groundwaters, South-West Lockyer Valley, Queensland, Australia: W. Dixon and B. Chiswell 359

Runoff Generation in Zero-Order Precambrian Shield Catchments: The Stormflow Response of a Heterogeneous Landscape: C. J. Allen and N. T. Roulet 369

VOLUME 8, ISSUE No. 5 *September–October 1994*

Interactions Between Groundwater and Surface Water in a Virginia Coastal Plain Watershed. 1. Hydrological Flowpaths: K. N. Eshleman, J. S. Pollard and A. K. O'Brien 389

Interactions Between Groundwater and Surface Water in a Virginia Coastal Plain Watershed. 2. Acid-Base Chemistry: A. K. O'Brien, K. N. Eshleman and J. S. Pollard 411

Numerical Versus Field Studies of Delayed Yield in Response to a Moving Water-Table: S. A. Gutub and S. A. Awadalla 429

Automated System for Measuring Snow Surface Energy Balance Components in Mountainous Terrain: K. A. Sauter and J. J. McDonnell 437

The Link Between Glacier Velocity and the Drainage of Ice-Dammed Lakes: Comment on a Paper by Knight and Tweed: D. M. Lawler 447

Dissolved Organic Carbon Dynamics in Two Streams Draining Forested Catchments at Loch Ard, Scotland: I. C. Grieve 457

Impact of Post-Mixing Chemical Reactions on the Major Ion Chemistry of Bulk Meltwaters Draining the Haut Glacier D'Arolla, Valais, Switzerland: G. H. Brown, M. Tranter, A. M. Gurnell and P. W. Nienow 465

Major Ion Variation and Efflux Related to Discharge in a Mafic Piedmont Province Watershed: S. Rose 481

VOLUME 8, ISSUE No. 6 *November–December 1994*

Indirect Estimation of Ungauged Peak Discharges in a Bedrock Channel with Reference to Design Discharge Selection: P. A. Carling and T. Grodek 497

Evaluation of the Method of Collecting Suspended Sediment from Large Rivers by Discharge-weighted Pumping and Separation by Continuous-flow Centrifugation: J. A. Moody and R. H. Meade 513

Distribution of Caesium-137 in Soils Across a Hillslope Hollow: C. D. Morris and R. J. Loughran 531

Similarity Analysis and Scaling: an Application to Soil Infiltration: C. Li and J. Shen 543

Hydrological and Hydrochemical Response of Mountainous Basins to Snow Accumulation and Melting in Northern Slovakia: G. Babiakova, D. Brodiš and D. Palkovič 551

Modelling Sediment Transport in Stream Channels in the Arid Zone of India: K. D. Sharma and J. S. R. Murthy 567

Mountain Hydrology of Canada and China: A Case Study in Comparative Hydrology: M. Woo and C. Liu 573
